Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 30 ^{day} MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a reflection type LCD, classified in class 349, subclass 62.
 - II. Claims 15-17, drawn to a reflection type LCD with housing, classified in class 349, subclass 58.
 - III. Claim 18, drawn to a reflection type LCD with diffusion means, classified in class 349, subclass 64.
 - IV. Claims 19-21, drawn to a reflection type LCD with antireflection means, classified in class 349, subclass 137.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II-IV and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claims drawn towards the combinations II-IV do not require the details of the subcombination as defined in claims 2-14. The subcombination has separate utility such as in an LCD without a housing that wraps a part of the light source part and the light guiding part, an LCD that does not

Art Unit: 2815

include separate diffusion means between the light source part and the light guiding part, and an LCD that does not have antireflective means between the light guiding part and the LCD panel part.

3. Inventions II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as in an LCD that does not include separate diffusion means between the light source part and the light guiding part and that does not have antireflective means between the light guiding part and the LCD panel part. Invention III has separate utility such as in an LCD without a housing that wraps a part of the light source part and the light guiding part and that does not have antireflective means between the light guiding part and the LCD panel part. Invention IV has separate utility such as in an LCD without a housing that wraps a part of the light source part and the light guiding part and that does not include separate diffusion means between the light source part and the light guiding part. See MPEP § 806.05(d).

4. Claim 1 link(s) inventions I, II, III and IV. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 1. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a

Art Unit: 2815

continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
